Cotton & Wool Union Suits, \$1.00 \$1.25

Boys' Natural Wool Union Suits \$1.00

## BAPTIST WOMEN IN CONVENTION

Devotional Services Last Night Start Work of Tenth Annual State Meeting.

### MANY DELEGATES PRESENT

Committees from Richmond Churches See to It That Delegates Are Entertained.

With a devotional service participated in by more than 200 delegates from various places in the State and by members from the twenty-one Baptist Churches in Richmond and vicinity, the Woman's Missionary Union of Virginia, began its tenth annual convention at the First Baptist Church last night. The service was presided over by Mrs. G. W. McDaniel, of Richmond, president of the State Union.

Other State officers, all of whom are in attendance at the convention, follow: Mrs. G. A. Scholz, Hampton, vice-president; Mrs. George L. Luck, Roanoke, second vice-president; Mrs. J. P. Thomas, Richmond, corresponding secretary; Miss Sue D. Herring, Richmond, recording secretary; Miss Alta Foster, Richmond, assistant secretary; Miss Inez Barnes, Richmond, treasurer; Mrs. George H. Williams, Richmond, superintendent of bands; Mrs. William Ellyson, Richmond, auditor; Mrs. W. S. Leake, Richmond, Y. W. S. leader.

Committees to Entertain.

Local Baptist churches since appointed a general committee, among the several congregations on hospitality, and this committee was instructed to select homes for the delegates and to see to it that every delegate was catered for in every way while in Richmond, so that she would extract pleasure out of the visit, as well as profit from the convention work.

The committee follows: Mrs. L. H. Harris, First Church; Mrs. T. B. Johnson, Second Church; Miss Alta Foster, Grace Street Church; Mrs. Phillips, Grove Avenue Church; Mrs. E. M. Parrish, Pine Street Church; Mrs. T. G. Leigh, Leigh Street Church; Miss Rosa England, Calvary Church; Mrs. Lindsay, Immanuel Church; Mrs. E. M. Long, Tabernacle Church; Miss Nannie Bates, Broadwood Memorial Church; Mrs. Burton, Mountcastle, Barton Heights Church; Miss Janie Burruss, Venable Street Church.

Busy Program for To-Day.

At 9:30 o'clock this morning the convention will begin work, and a very busy day is planned. Devotional services will start the day's work, after which delegates will be enrolled; reading of the constitution will follow. Then will come greetings, responses, recognition of missionaries and distinguished visitors, address of the president, reports of the corresponding secretary, treasurer, auditor, superintendent of bands, and Young Woman's Society leader.

The next place for meeting will be considered and nominations for new State officers will be made. The recommendations of the Foreign Mission Board will be read. Superintendents will make three-minute talks on work in their localities.

Luncheon will be served to the delegates in the church building to-day and Saturday by members of the local churches. The convention will be in session daily till Monday evening, and some of the leading Baptists of the United States will be in attendance at some of the meetings.

Blues' Armory Plans

Working Drawings Nearly Ready, and Will Be Offered for Sale.

Plans for the Blues' armory and market house, to stand at the corner of Sixth and Marshall Streets on the site of the present vegetable market, will be ready on the 15th of this month, according to a telegram from the architect, Messrs. A. C. and H. H. Washington, Washington, D. C.

The committee on Grounds and Buildings last night. A resolution was passed authorizing Building Inspector Beck to advertise for bids as soon as the detailed working drawings and specifications are ready.

Expectations to have the award of the contract approved by the December meeting of the Council.

There is no specific cure for tuberculosis. Many of the wisest physicians of all times have sought for a drug that would cure the disease. Practically every known drug has been used to treat the disease, but without success. The cases of consumption that have recovered have been cured by the following simple remedies that are within the reach of all: Fresh air, rest, good food, sunshine, proper living.

Prevention Better Than Cure.

Recognizing prevention as even more effective than a cure, the emphasis is placed on the destruction of the germ as it leaves the patient.

An article by Dr. E. C. Levy, Chief Health Officer of Richmond, on "Outdoor Life in the Prevention and Cure of Tuberculosis," outlines the modern method of treating the disease. In summing up the situation, Dr. Levy declares:

"There is no specific cure for tuberculosis. Many of the wisest physicians of all times have sought for a drug that would cure the disease. Practically every known drug has been used to treat the disease, but without success. The cases of consumption that have recovered have been cured by the following simple remedies that are within the reach of all: Fresh air, rest, good food, sunshine, proper living."

SUES TELEGRAPH COMPANY

The suit of Abe Cohen, against the Western Union Telegraph Company for penalty damages in the sum of \$100 for alleged failure to deliver a message was begun in the City Circuit Court yesterday. After the testimony the jury was adjourned over to Monday afternoon at 4 o'clock. Judge and jury heard the argument on instructions yesterday afternoon.

Marriage Licenses.

Marriage licenses were issued yesterday in the clerk's office of the Hustings Court to the following couples: Henry J. Hudson and Mary E. Hudson; Garibaldi Dervishian and Marianne Jaskalian.

Thereby hangs another side of the story. The last Legislature passed an act to provide for furnishing lists of names of voters for the purpose of providing compensation for copies of same. For making and certifying this list the treasurer of any city or county is allowed under the new act, 3 cents for each ten words, counting initials as words, and the clerk of the Circuit Court is allowed under the Corporation Court of the city is allowed for copying and certifying the same list 2 cents for each ten words, counting initials as words, for the first copy, and one-half a cent for each ten words for all other copies required. The act made, these fees to be paid out of the corporation treasury.

Mayor Richardson said last night that he saw no reason why the treasurer and clerk should furnish three complete lists for the three years in which the capitation tax is required to be paid.

It has been the custom in Richmond to list each name three separate times, making it necessary for the judges of election to go through three books to ascertain whether an applicant had paid his taxes, and thereby increasing the fees to treasurer and clerk. In the county of Henrico the name is listed but once. Three columns follow, indicating the three years in which the taxes are required to be paid, so that the judges of election may, at a glance, see whether the applicant is qualified by the payment of taxes for three years.

Mayor Calls for Reform.

"We need a reform in this matter," said the Mayor last night. "I have not completed my inquiry, but it is apparent that a simpler and more efficient method of listing the names could be devised. I do not think the law contemplated the listing of each name in the city three separate times with the consequent tripling of fees, and resultant confusion and delay at the polls. I shall consult Judge Witt and others interested before taking any step, but I am quite certain that a reform is needed in several directions."

Since all persons who have paid as much as one year's taxes in the past three years are entered, the list is voluminous one, greatly exceeding in length the list of actual voters. Copies are required for the twenty-four election precincts, making the cost to the city, through extra fees imposed by the Legislature in addition to the printing bills, an amount to a large sum, an exact amount of which no one seems willing to make public.

CASTORIA

The Kind You Have Always Bought

Bears the Signature of J. C. Watson

Richmond Merchants Do Not Wait to Be Called On to Contribute.

The outlook for the "Greater Richmond College" campaign brightens every day. Half of the ten teams of ten men each were completed yesterday, and it is expected that all committees will be organized by to-night. Sub-committees have been holding daily sessions in preparation for the ten-day campaign, which begins next week. There will be a full meeting of the executive committee this afternoon to adopt final plans for the campaign.

The committee consists of Lieutenant Governor J. Taylor Ellyson, chairman, and Messrs. N. W. Bowe, Joseph Bryan, H. L. Cabell, Samuel Cohen, W. S. Forbes, B. M. Gwathey, O. A. Hawkins, I. H. Kaufman, John Landstreet, T. B. McAdams, John M. Miller, L. Z. Morris, A. W. Patterson, Edmund Strudwick, F. T. Sutton, T. C. Williams, Jr., John T. Wilson and Coleman Wortham.

Though the canvass of the city has not yet begun, contributions to the fund are coming in every day. A broad Street merchant sent his check for \$100 yesterday. A gentleman from Massachusetts, who was spending only one day in Richmond, asked for a pledge card yesterday and wrote his name down for \$100. Another subscription for \$100 was reported yesterday by a captain of one of the teams, who said it was handed him on the train by a Richmond member of the Travelers' Protective Association. Another member of the wholesale section of the city, who asked to serve on a committee, said he would gladly do so, and also wished to subscribe at once \$500 to the fund.

The encouragement given the organizers of the campaign has been highly gratifying. Chairman Ellyson says he is delighted, and believes the work will be speedily carried to completion.

Excursion to New York Horse Show

Old Dominion Line personally conducted excursion leaves Friday, November 6th, via Night Line, 7 P. M.; Saturday, November 7th, via C. & O. Ry., 4 P. M., arriving New York Sunday, 8 P. M.

Round trip ticket only \$12, good for ten days, including meals and state-room berth. Special hotel rates have been made for the party in the Hotel York.

JNO. F. MAYER, Agent, 808 East Main Street.

## WAR IS DECLARED ON TUBERCULOSIS

State Department of Health Issues Bulletin on Consumption.

### TO ESTABLISH SANATORIUM

Plain Rules Given for Prevention of Spread of Disease.

In a bulletin issued yesterday, which will be sent broadcast over Virginia, the State Department of Health announces a campaign against tuberculosis which will be pressed with all vigor. The bulletin is intended to cover the elementary facts regarding a disease which every year kills about 5,000 citizens of this State, and which is held to be clearly preventable. The bulletin will be sent without charge to any one applying to Dr. Ennion G. Williams, Chief Health Officer, and will prove of the greatest interest. It is profusely illustrated. The plan of campaign is announced as follows:

"First—The education of each individual citizen of the State as to the truth about consumption, and will prove of the greatest interest. It is profusely illustrated. The plan of campaign is announced as follows:

"Second—Co-operation with existing anti-tuberculosis associations in the State and the extension of this work every county, town and city shall have an anti-tuberculosis association to carry on the work in detail in its community.

"Third—Legislation by every city, county and town to provide means to help the consumptive poor and to secure the isolation of those who cannot be educated to use proper means of prevention.

"Fourth—The establishment of State sanatoria sufficient in size and number to treat all early cases, the actual cost of the isolation of those who cannot be educated to use proper means of prevention.

Germ's Breathed Into Lungs.

The hereditary idea is entirely discredited by the bulletin, which says in connection with the bacillus of tuberculosis:

"The germs of consumption can grow in any part of the body; hip disease in children, humpback, scrofula and white swelling, are some of the common forms of tuberculosis. Tuberculosis of the lungs is known as consumption."

"Not every one that breathes in the germs develops the disease. Every adult has probably at some time been infected with them. When one's system is normal and healthy condition, the germs have only a slight chance of living and multiplying; but when the system is weakened by excesses, by improper living, or by other disease, they will probably thrive well. Even a well, strong person may not be able to resist the danger if they are taken into the lungs in large numbers, or very frequently."

In regard to the spread of tuberculosis, the bulletin says positively:

"A careful consumptive is not dangerous to those about him. A careless consumptive is a danger to all those with whom he comes in contact."

Prevention Better Than Cure.

Recognizing prevention as even more effective than a cure, the emphasis is placed on the destruction of the germ as it leaves the patient.

An article by Dr. E. C. Levy, Chief Health Officer of Richmond, on "Outdoor Life in the Prevention and Cure of Tuberculosis," outlines the modern method of treating the disease. In summing up the situation, Dr. Levy declares:

"There is no specific cure for tuberculosis. Many of the wisest physicians of all times have sought for a drug that would cure the disease. ## THREE FEES CHARGED FOR EACH NAME LISTED

FELL IN SLEEP; IS BADLY HURT

### Manly B. Ramos Takes Step

Amiss and Is Found Unconscious in Front Hall.

Aroused by an unusual noise, which gave the impression that their home was being invaded by burglars, the family of Mr. Manly B. Ramos, of No. 105 South First Street, leaped from their beds shortly after 1 o'clock yesterday morning. There were moments of suspense, but within a remarkably short time all fears were dispelled when distinct groanings attracted the attention of the anxious listeners.

A boy peering through a crack of his bedroom door spied his father prone on the floor in the front hall. Other members of the household were called. The father had fallen down a flight of stairs, and had been rendered unconscious by injuries. The apparently lifeless body was taken to the bedroom on the second floor.

A physician was called in, and after an examination stated that Mr. Ramos had escaped with a broken collar-bone and many bruises. The injured man was unable to leave his bed yesterday, though his condition last night was said to be much improved.

Mr. Ramos' bedroom is situated about twenty feet from the top of the steps, down which he fell. He arose from his bed in his sleep, and after having succeeded in walking down a small flight of three steps, he fell down the main staircase to the hall floor. The injuries will not prove fatal, but the experience is one which Mr. Ramos says "I never care to experience again."

None of the members of the family knew of the accident until
